Aaji Sewa Kendra - Dharavi

- ASK continues to care for the aajis (widows) in Dharavi. Recently, we paid for medical treatment for Shanti, one of the old ladies who comes to the Kendra regularly. Another aaji, who was kicked out of her house by her daughter, has started joining us. Please pray as we continue to look after these neglected and needy aajis.

Pictures of two of the assignments completed by the Nursing trainees in Salem.

Glory School - Dharavi

- We are conducting classes online. Many students are not able to pay fees but we trust the Lord for provision. God and his people have not let us down.
- Please pray for our premises. Our landlord's family are in dispute, which has meant that the property the school uses has been divided. The building has been partitioned and we have lost a quarter of the place. The rent has also been increased.
- The remaining space is not enough so we need the first floor of the building. Pray that the building space will soon be available - at a reasonable rent.
- Pray for God's wisdom and good health for Virendra and his family, as well as all the staff.

Funds Distribution

Thank you for your October, 2020 contributions (Rs. 10,125). They were used as follows:

Nireekshe, Mysore : Rs. 20,000
Yuvalok, Bangalore : Rs. 20,000

Nurses Training Programme - Salem

- Online classes for the nursing students are going well. The students are responding conscientiously and are completing their assignments on time.
- Students with no access to the internet or a smartphone connect with us through conference calls. They also visit the institute now and then for additional coaching and submission of the assignments.

Project Karuna - Gulbarga

- We served Jyothi Leprosy Colony i Yadgir by planting marigold flowers.
- Other organizations distributed water cans to the leprosy colony residents.
- We gave some more plastic sheets to cover the roofs of the houses in Gandhi Leprosy Colony. These protect them from rain water leakage.

Shining Light School - Pune

- Praise God! Construction of the new facility is almost completed. Thank you, Lord!
- Residential school children are moving in to their new home at the recently constructed building. As of now, four boys and four girls have moved in. Each child goes through two COVID-19 tests - the first by the government, and the second which we conduct after 14 days of quarantine.

One safe water system was installed in the state of Karnataka, in October
